### ROCHESTER BEATS TONOPAH'S RECORD

Her First-year Production Al- Thirty or Forty Feet More Indications Are That General most Doubles That of Tonopah.

The camp of Rochester in its first year nas almost doubled the output of Tonopah during the corresponding period of its being driven forward at the rate of existence. F. A. Wheeler of Chicag, wide- about eighty feet a month. It is beexistence. F. A. Wheeler of Chicag, widely known in the mining camps of the west, who has just completed an inspection of the Rochester region, is quoted by a Lovelocks paper as saying:

Lovelocks raper as saying:

The showing surprised me. All accomplished in less than a year. I was at the borning of Tonopah and Goldfield and saw their development. In comparison, considering time and production, Rochester is the real thing. The conditions are great and the future possibilities of the district superior to anything I have seen in my extended travels. Remember that Tonopah's production during the first year was something over \$300,000, while I am reliably informed that the first year was something over \$300,000.

This to accompany to the Rochester district is over \$55,000.

This is the equivalent of saying never in the history of Nevada was the mining future brighter or the present showing better, and Rochester is the important contributor to this observation. Another thing, the district is not a one-vein camp. The two main big veins exposed through work are on the Nenzel property and the Buck and Charley. Radiating from these are numerous cross fassure great bodies of ore and which can be lamiled at a profit. This means something and that is, that the earth from Fackard and beyond American canyon north to Rye Patch and westerly beyond Lincoln hill is broken with veins and dykes carrying the precious and useful metals and which in time will prove the great mining producing section of the west.

#### DOES ANNUAL WORK ON GYPSUM CLAIMS

Pai Ryan, Jr., son of Mr. Ryan, who has extensive holdings in the iron deposits of this county, is spending a few days in Cedar City and vicinity, and is laving the annual assessment work performed on some gypsum claims in Coal Creek canyon, says the Cedar City Record, James F. Younger has the contract for performing the work.

Mr. Ryan states that it is their idea to some time establish a coment factory on their property. He states that up to the present time no options have been given on their iron properties, but he feels very much encouraged with the prospects of General Oils and associates doing something with their projected enterprises for the development of the iron deposits of this country and the establishment of iron and steel works on the coast of California.

#### TALMAGE PROPERTY MAKES GOOD SHOWING

Development work that is in progress on the Talmage property is showing new possibilities of mine making at some distance from the mines that have been producing and making profits, according to a report in the Goldfield Tribune. Under the direction of C. W. Hays, one of the principal stockholders, a thorough system of development is being carried on and ore of medium grade in considerable quantity has been exposed. The better grade of ore is now being saved for shipment and it is apparent that there is enough of this material in sight to return a profit.

The main velm, according to the mine surveys, is fully twenty feet wide and in this ledge are found seams of ore, varying from a few inches to three feet, seven inches in width and yielding average assays from \$9.05 to \$19.35 per ton, the chief mineral content being gold, with some copper.

### TWENTY-TON SHIPMENT **BRINGS OWNERS \$150**

A twenty-ton shipment of ore from the Mayflower group in Oregon to a smelter here was settled for yesterday and netted \$1500. A 1350-pound lot, thought by the owners to be hardly worth ship-

by the ewners to be hardly worth ship-pling, showed twenty-one ounces of gold, or about \$100 to the ton.

The Mayflower group is located on the great Ochocho uplift in central Ore-gon, a physical feature of that region widely known among mining men and students of geology.

Then Maguire of Ogden is looking after the shipments from this very promising property and district.

The "Mischief Quartette" and Its Work.

Each year the month of January numbers its list of victims from influenza, la grippe, bronchitis and pneumonia. The prompt use of Polev's Honey and Tar Compound will cheek the onset of a cold and stop a cough. preventing the development to more serious conditions. Keep it on hand, Sehramm Johnson, Drugs, "The Never-Substitutors," Five (5) Good Stores. (Advertisement.)

# TUNNEL OF TINTIC ZINC IN 330 FEET

Will Carry It to the Ledge.

The tunnel at the Tintic Zinc property in north Tintic is now in 350 feet and is lieved it has but thirty or forty feet yet to go to strike the ledge and this dis-tance should be accomplished in something like two weeks

This ground is about five miles from Eureka and two miles from the Scran-The formation is the same as that of the north Eureka district, and the same vein from which the ores of the Scranton have come is plainly trace-able through the buildings of the Tin-tic Zinc. All the indications are that the same excellent grade of zinc-lead ore produced by the Scranton will be found in the vein at the point soon to be tapped by this tunnel.

Reports Favorable.

Reports Favorable.

Reports from the Sandstorm-Kendall Consolidated are altogether favorable. The ore appears to be holding up well in the main workings and with the installation of the new plant it will be possible to expedite the development work, as well as the breaking of ore from the seams that have shown the potentialities of the property as having the making of a paying mine. The new plant includes a high power electric triplex pump, geared to raise 200,000 gallons of water every twenty-four hours under a 500-foot head.—Goldfield Tribune.

Metal Market Metal prices posted in yesterday's market were as follows: Silver, 578 cents; lead, \$4.15; copper, \$14.65.

# COPPERMINES IS BIG

Has Nearly 3000 Acres in Car of Rich Ore Will Be Mine Closes Down While Great Robinson Por-

phyry Zone.

The Consolidated Copper mines hold-The Consolidated Copper mines holdings in the porphyty zone at Ely now comprise more than 150 claims and fractional claims having an area approximating 2750 acres. This company holds the largest area of any concern in the district, and in addition to the mineral territory owns 3985 acres of ranch lands. Nevada Consolidated shows up as the next in rank as to area owned, being the possessor of 159 claims aggregating about 1969 acres. The center of interest on this company's holdings naturally is the Copper Flat and Liberty pits which are rapidly being made one great hole, according to the Ely Expositor. The east-west diameter of the two filts is about 4000 feet. These holes

district has predicted that the future will see a series of pits extending through Nevada Con. Butte & Ely and Giroux groups that will be three miles long from east to west and hundreds of feet deep. His prediction is based on an intimate knowledge of the district and the records of scores of churn drill holes that have been bored to prospect the properties. But this will not come to pass for many years and it is doubtful if any of the youngest generation living here at present, though they may live to a ripe old age, will see the exhaustion of the great copper deposits now being worked.

### SAYS STOCK MARKET SLOWLY BROADENING

James A. Pollock & Co., investment brokers at 169 South Main street, supply the following, received over their private wires yesterday:

From Logan & Bryan, New York—There was a marked increase of strength and activity during today's session. At the outset prices were irregular, but later rumors became insistent with regard to an announcement on Union Pacific relative to the latter's distributing its holdings of Baltimore & Ohio and reducing its disbursements to ordinary shareholders. It was officially announced that the executive committee of the road would recommend the above action, but owing to the conflicting views which were expressed traders in general were disposed to hold buillsh operations in check. There has been so much talk in the past of the Union Pacific preferred stockholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stockholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stackholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stockholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stockholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stockholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stockholders being entitled to share in a distribution that apparently some protest is feared from the owners of the preferred stockholders being entitled to share in a distribution. The tallings now under construction for the purpose of making a recovery of every particle of the precious metal that is known to science. An appropriation of \$650,000 has been made for this slimes blank and well handle all the slimes that are now going to the setting pond. The new leaching plant is to be situ

Trading in the market is broadening gradually and we still adhere to the view that advantage should be taken of prevailing levels to make purchases of the standard issues, particularly for invest-

ment

From Paine, Webber & Co., Boston—
Action of Union Pacific executive committee was very favorably received and
Union Pacific looks very cheap at present prices. As the dividend will amount
to \$21 and selling ex-dividend at \$17
and paying \$ per cent it will be very
low. Local coppers held their own and
showed slightly better support, although
the volume of business was small. We
expect to see a good rally result from
the action of Union Pacific.

From the Gallagher Curb Letter, New
York—Oil shares were the feature,
Plerce Atlantic and, in fact, the whole York-Oll shares were the feature, Pletce, Atlantic and in fact, the whole list, being exceedingly strong and active. Tobacco shares were firmer, under the leadership of Cigars, which sold at 25.

Will Make Another Ely.

Will Make Another Ely.

W. H. Brav of Battle Mountain is interested in the Brav-Boyd copper property, seven infles and a half southwest of Battle Mountain, and believes that it is going to make one of the big producers of the state. The belt in which the property is located has been traced for 10,000 feet along its strike and when cross-cut in two places at 100 feet depth shows copper values averaging better than 2 per cent—Carson News.

positor. The east-west diameter of the two filts is about 4000 feet. These holes are being enlarged and deepened by regular operations and when the lower levels are connected a much greater depth can be reached and heavier trains of ore can be pulled out from the lowest workings.

A prominent mining engineer of the district has predicted that the future will see a series of pits extending through Nevada Con., Butte & Ely and Ghous groups that will be three miles long from east to west and hundreds of feet deep. His prediction is based on an intimate knowledge of the district and the records of scores of churn drill holes that have been bored to prospect the properties.

## \$3,000,000 MILL FOR ANACONDA TAILINGS

Mining Notes.

A contract for an additional 100 feet of tunnel at the Greenhorn property in the Ohio mining district has been let by General Manager W. E. Havenor, The tunnel is now in 800 feet J. B. Wheeler is working a lease on the Manhattan property at Pioche, from which some good carbonate ore is being taken.

The new Alta railroad is now in op-eration and the Michigan-Utah and the Alta Consolidated are sending out ore that way.

The long-sought secret of hardening and tempering copper is believed to have been discovered by Richard J. Cunningham, Henry W. Hooten and J. S. Barrett, who have been carrying on experiments at 557 Fifth East street. The process is claimed to be cheap, costing but from 60 to 80 cents a ton.

from 60 to 80 cents a ton.

Professor J. C. Roberts, who has been connected with the experimental work of the United States bureau of mines at Denver, has been assigned to the University of Utah to take up the experimental work here.

Fells and John Obelander, brothers and smelter men at Murray, have started for Burma, India, where they will enter the employ of the Meha Chang Smelting & Exploration company, Another brother, Arthur Obelander, has been in India seven years and is general manager of the smelting company.

System of Operation Is Changed.

Idaho, was closed down January 1. President A. S. Ross has just returned here from the mine, having come back that way from a trip to Pennsylvania. length of the shutdown is indefinite, but it may be only temporary

Two reasons are given for the action the low price of lead and the desire to make some improvements in the present method of extracting the ores, by which the mining costs will be materially reduced. The building of the tramout \$1.40 a ton from the cost of placing the ore aboard the cars and Mr. Ross believes a further reduction of almost as much can be made by the mine improvements contemplated. mprovements contemplated, Development work below the 400 sta-

Improvements contemplated.

Development work below the 400 station, or the tunnel level, has been through a small single compartment shaft. It is the purpose of the management to sink a three-compartment shaft below the tunnel level to a considerable depth, provided the ore is found continuous to a greater depth than has been penetrated at this time. In various portions of the property the ore has been proven to continue strong and in place and indicates that it will make to considerable depth below the tunnel level.

Another improvement will be made in the power by which the company has carried on its operations. Instead of having various small plants distributed throughout the property, the power will be assembled in a main plant and a large hoist will replace the donkey engine that is being used over the small shaft. Just what power will be used has not been determined, but it may be electricity, gasoline or a steam plant with sufficient energy for all purposes. The Latest Out mine has discontinued shapping and will sink a three-compartment shaft from the surface to a depth of at least 1000 feet. The entire district looks good and Mr. Ross says that

7 to 8 Year Old -W.H.M.BRAYER'S

Bottled in Bond-Always Same Price

CEDAR BROOK

Same Price 7to 8 Years Old

Why take less or pay more, when you

can always get W. H. McBrayer's Cedar

Brook bottled in bond 7 to 8 years old? It is our policy to provide 7 to 8 year

old Cedar Brook to the dealer, and

he can sell it to you at the same price

vou have to pay for other 4 to 5 year

old advertised bottled in bond whiskies.

"World's Finest Whiskey"

At All Leading Places

whiskies you can always enjoy the famous smooth, rich, mellow, "double ripeness" of

Cedar Brook, at the same regular price, if you only ask for it at leading hotels, bars, clubs, etc

Regardless of "shortages" of aged

So you pay no more for the
